WORK EXPERIENCE

Front-end Developer, MealOBox

May - September 2022

- Worked along with design team to create usable simple user interface.
- Built the interface along with team of 3 members.
- Integrated API from backend team.
- Held session with founder and business team for strategy and launching plans.

PROJECTS

Quizzical

[Check it live](#)

[Github](#)

- A quiz app built in react, using **OTDB** API and hooks **useState** and **useEffect**, and using **SessionStorage** to check answers.

FavMovie

[Check it live](#)

[Github](#)

- Built with **Vanilla JavaScript**.
- User can **search** for movie with and then it sends the **keyword** to API and receive similar movies or web series.
- By clicking, "**add to favorites**" the movie gets saved in **Local Storage** and can be found on 'favorites' page.

Lead Tracker extension

[Check it live](#)

[Github](#)

- Using JavaScript, created a Web page **Chrome extension** that enables user to instantly capture the **URL** of the current page and save it into **local memory** to use it later for leads or any other purpose.

PARTICIPATIONS

Chingu Voyage

September, 2022

[Check it live](#)

- In a month long cohort designed and built 'WeDesign' for helping designers to pick the best version of their design.
 - Brainstormed ideas, iterations, designed and collaborated with 5 people across 4 countries.
-
